Mission

Our primary mission is to make the world a more accessible and inclusive place. We're working toward this goal every day by helping businesses and organizations achieve their accessibility compliance goals. We do this by providing supports and services to increase awareness, augment capacity, and verify and maintain compliance with ADA laws.

Increase Awareness

At Aurora, we're working to increase awareness of accessibility issues by training organizations and personal in accessible technology and best practices for developing and publishing accessible websites, documents, multimedia presentations, and more.

Augment Capacity

We're working to supplement organizational expertise by providing expert assessment, repair, and certification of websites, documents, and multimedia presentations for Section 508 and WCAG 2.0 conformance.

Verify and Maintain Compliance

Aurora offers accessibility certifications to verify conformance with accessibility guidelines and laws including Section 508 and WCAG 2.0. We also offer accessibility conformance monitoring to help businesses and non-profit organizations stay compliant.

Accessible Information Technology for Businesses, Government Agencies, and Non-Profit Organizations

About Aurora

Aurora Design and Consulting, LLC (Formerly Aurora Galleries, Inc.) was established in Honolulu, Hawaii in 2002. Since then, we've been helping local businesses, government agencies, and non-profit organizations develop successful online brands and achieve their accessibility compliance goals.

At Aurora, we believe that equal access to information is a basic human right. We're passionate about accessible design because we believe that information and technology should be accessible to everyone. Our mission is to make this a reality by helping you assess, repair, and validate your website for conformance with the W3C's Web Content Accessibility Guidelines (WCAG 2.0).

Advantages of Aurora Accessibility Services

Pay for Services, Not Software

Many vendors offer expensive and proprietary software packages to scan your website for errors. They'll happily charge you 50-100K to license this software to identify accessibility barriers on your website. Then it's up to you to find someone to fix it, or make the repairs yourself.

At Aurora, we don't believe that you should be stuck with a bill for an expensive software package that does not fix your problems. In fact, all the tools that we use for website accessibility evaluation are completely free!

Work with a Local Company

Mainland accessibility vendors are in a different time zone, and in many cases are 3-6 hours ahead. What happens to your project when the vendor office closes, and you have a question or problem? You'll find yourself spending more time talking to voicemail and hoping for a call the next day.

Get help now, and when you need it!

Benefit from our Experience

Aurora Design and Consulting has been helping Hawaii businesses and non-profits meet accessibility conformance goals for over fifteen years. We have a wealth of experience in assistive technology, accessible web development, document accessibility, and more.

We are your accessibility compliance partners!

A good team is essential to achieving your accessibility compliance goals. Don't go down this road alone!
